

## Full Stack .NET Developer - Burnaby, BC (Canada)

Snipp is a fast-growing publicly listed company focused on building promotions, loyalty and shopper marketing technology solutions for brands. We work with some of the largest brands and agencies in North America and increasingly internationally and produce cutting-edge campaigns for them.

We're looking for a talented C# developer who has a strong web application development background to join the Snipp team – it is a very dynamic, fast paced Agile Software Development environment. We love coding, are eager to utilize the most advanced technology to develop our products, and we proactively keep our knowledge up to date from every single project we build. We work smart, we work hard, and we have fun.

### Professional Requirements:

- Minimum 4 years of .Net development experience with web-based products using MVC, and C#
- Experience with:
  - HTML5 and CSS3
  - Javascript and jQuery
  - Frameworks such as Angular, React, Backbone, etc.
- Experience with WebAPI, WCF RestFul services, and XML
- Excellent MS SQL database skills are required
- Excellent problem-solving and critical thinking skills
- Familiarity with iterative software development and JIRA
- Experience with highly scalable / high traffic solutions
- Excellent communication skills
- Team player who can help colleagues as well as work independently
- Excellent time management skills, with the ability to meet tight deadlines

### Bonus Qualifications:

- Experience with modern front-end ecosystem and concepts (ex. Module loader, JS package management, task runner/build tool)
- Experience with user interface design and graphics
- Experience with Agile development methodologies
- Experience with AWS services (e.g. S3, DynamoDB, Lambda)
- Experience with OCR
- Experience integrating with Microsoft PowerBI

### Position Responsibility:

- Web component and application design and implementation
- Get involved in web application related architecture decision and workflow review
- Transactional Database design and Implementation
- Make recommendations of technology best practice to team members and project managers and incorporate approved recommendations into work
- Promote & develop relevant and emerging technologies that enhance our web platforms capabilities
