

Software Engineer - Mumbai

Snipp is a fast-growing publicly listed company focused on building promotions, loyalty and shopper marketing technology solutions for brands. We work with some of the largest brands and agencies in North America and increasingly internationally and produce cutting-edge campaigns for them.

We're looking for people with .NET web development experience, but more than that, we want them to be smart, entrepreneurial, enjoy challenges and working on cutting edge technology – no one will be holding your hand here. In exchange, we promise to pay you well (at more than competitive starting salaries), give you lots of flexibility in how/where you work, present you with lots of challenges so you will never be bored and oh yeah, give you real options in a public company (so they're actually worth something already).

Position:

Software Engineer (.NET)

Responsibilities

- Developer will be working on a host of cutting edge applications including:
- Work with product development team to develop your own interfaces for each product
- Work with a small lean technology team and share best practices and resources across each other

Key Technical Requirements:

- 3-5 years of .NET web development experience (Visual Basic and C#), ASP.NET MVC, WCF, nHibernate, Entity Framework as well as a solid understanding of Object Oriented Design and Programming
- AngularJS experience would be preferred
- Great communication skills and proficiency with English is a MUST
- Strong understanding of SQL Server and relational database structures
- A solid understanding of web application development processes, from the layout/user interface to relational database structures.
- Good knowledge of HTML, CSS, Javascript and JQuery / JQuery Mobile
- Must be a self-starter, able to work independently and able to approach tasks analytically and thoughtfully
- Must have experience working on scalable, high transaction volume web applications

Position Highlights:

- Flexible working hours – no clock here! Work from home options available as per company policy
- Working on cutting edge technologies (mobile, OCR, image recognition and more) and with a great tech development team
- Great responsibility and significant impact on product direction and actual product built and lots of room for growth
- Equity options in a publicly listed company (your options are worth something on day 1)
- Competitive salary and overall compensation packages
