

Full Stack .NET Developer

Snipp is a fast-growing publicly listed company focused on building promotions, loyalty and shopper marketing technology solutions for brands. We work with some of the largest brands and agencies in North America and increasingly internationally and produce cutting-edge campaigns for them.

We're looking for smart, entrepreneurial people who enjoy challenges and working on cutting edge technology – no one will be holding your hand here. In exchange, we promise to pay you fairly, give you flexibility in how/where you work, present you with lots of challenges so you will never be bored and oh yeah, give you real stock options in a public company (so they're actually worth something already).

We are looking for a talented and passionate full stack developer with a strong Javascript background who cares about creating quality products to join our team. As a full stack developer on the team, you will be working with other developers, project managers and QA to write and maintain clean and scalable code on our software platform. You will be involved in the frontend, backend, and everything in between. We believe that software development should be fun, enjoyable and productive. At Snipp, we work smart, we work hard, and we have fun.

Job Description:

- Use your critical thinking and creativity to help design, implement and deploy our software platform globally
- Make web application related architectural decisions and workflow reviews
- Design and implement scalable and high traffic transactional databases
- Build client-side UI thoughtfully with special attention on a positive user experience
- Iterate, improve and tune existing code to function efficiently in production
- Continually improve our products by utilizing new technologies
- Make recommendations of technology best practice to team members and project managers and incorporate approved recommendations into work.
- Promote & develop relevant and emerging technologies that enhance our web platforms capabilities.
- Work on a cutting-edge stack and build a next generation of a product that is used by Fortune 1000 brands.

Requirements

- Bachelor's degree in Computer Science, Computer Engineering or similar technical field is preferred
- 4+ years of hands-on experience as a professional developer building web applications
- Deep knowledge and experience with the following technologies:
 - JavaScript
 - Node.js
 - HTML5
 - CSS3
 - JS Framework such as Angular/React
- Strong in one or more development languages such as C# or JavaScript
- Experienced in one or more database technologies such as SQL Server, Oracle or PostgreSQL
- Familiarity with Agile process, iterative software development and JIRA
- Working knowledge of using a distributed version control system within a team environment
- Experience with highly scalable / high traffic solutions
- Thrive in a team environment who enjoys collaboration with colleagues
- Excellent time management skills, with the ability to meet tight deadlines.
- An innovative problem-solver and critical thinker with a high desire to stay informed about latest developments in the industry and to learn rapidly and expand your skills and contribution
- Self-starter with excellent communication, collaboration, and analytical skills
- Experience with MongoDB, Express.js and/or TypeScript is a plus
